How To Use The TAMID Slide Deck

There are basically two elements here – the template and the bank. You download the template to use, and copy and paste any slides you want from the bank.

1) Download the Slides Template. Open it, click "File", and select "Save As Template."
2) Download the Slide Bank.
3) Start a new presentation using the Slides Template – open a new presentation, click "File", and select "New From Template". Then pick the template you saved.
4) Copy any slides you want to use from the Slide Bank into your new presentation, and edit them there.

If you have any questions at all, don't hesitate to reach out to Justin or Maya.
